

## Recycled Art Found Object Sculpture Critique!

Imagine you are a gallery owner! (Gallery owners have pretty nice salaries, in the \$100,000 range! And they support artists and help sell their artwork)

Now, interview someone from a different table. This is what you need to find out:

Name? \_\_\_\_\_

What materials did you use to create your sculpture?

---

---

---

---

What is the theme, message or story behind your sculpture?

---

---

---

How do your materials or construction methods support your theme? \_\_\_\_\_

---

---

If time, money or materials were no object, how would you improve this sculpture? (for example, I would make it HUGE to represent.....&....., or I would make it out of \$100 bills, to better represent.....)

---

---

---

---

If you were to rate the success of your project from 0-100%, what number would you give yourself and why? \_\_\_\_\_

---

Now, flip this over and have your partner ask you the same questions 😊
